

FAHEEM ALI MIRZA

faheemalimirza07@gmail.com, 7671028880

Machilipatnam, Andhra Pradesh

PROFESSIONAL SUMMARY

B.Tech Information Technology graduate (GPA 8.31/10.00) with strong foundation in computer science, algorithms, and software development. Experience building full-stack applications using Python and Flask with focus on system design, database modeling, and secure authentication. Published research paper in Artificial Intelligence. Seeking a Research Intern opportunity to contribute to applied computer science research and scalable systems development.

EDUCATION

Bachelor of Technology in Information Technology
CR Reddy college of engineering
Expected graduation 2028
GPA: 8.31/10.00dy Engineering College

Related Work:

Data Structures, Algorithms, Database Systems, Object-Oriented Programming, Software Development

TECHNICAL SKILLS

- Programming Languages: C, C++, Python, Java, JavaScript
- Web Development: HTML, CSS, Flask
- Database: SQL, Relational Database Concepts
- Version Control: Git
- Concepts: Data Structures, OOP, Problem Solving, Basic Algorithms
- Tools: VS Code

Projects

- Study Room Project (September 2025 - Present)
- Virtual Study Room - Real-Time Collaborative Learning Platform
- Built full-stack collaborative platform using Python, Flask, SQLAlchemy, HTML, CSS, and JavaScript.
- Implemented secure authentication with hashed passwords, session management, and password reset workflows.
- Engineered real-time messaging and synchronization using Flask-SocketIO and WebSockets.
- Designed configurable room architecture (public/private/timed) with file sharing and chat controls.
- Developed PostgreSQL production database and deployed on Render with secure environment configuration.
- Technologies: Python, Flask, Flask-SocketIO, SQLAlchemy, PostgreSQL, WebSockets, REST APIs, Git
- Here is the link for my studyroom project <https://studyroom-p0nm.onrender.com>

Hackathons and Certificates

- Hackathon Participation Certificates (April 2025 - Present)
- Participated in multiple hackathons focused on rapid prototyping and collaborative software development.
- Worked in team environments to analyze requirements and build functional web-based solutions within deadlines.
- Demonstrated problem-solving skills and teamwork under time constraints

RESEARCH EXPERIENCE

- Artificial Intelligence Techniques, Methods and Framework: An Epigrammatic Analysis published at zenodo.
- Conducted structured literature review on AI methodologies and computational frameworks.
- Analyzed comparative strengths of AI techniques across problem domains.
- Synthesized findings into academic manuscript.
- Link to published research paper: <https://doi.org/10.5281/zenodo.13999765>
